

# JAPAN P&I NEWS

外航組合員各位

## コロンビアー2024年麻薬密輸報告書

コロンビアのコレスポンデント A&A Multiprime から掲題に関する情報を入手しましたので、要点をご案内します。

本船上で麻薬が見つかった場合、当局や検察の調査が開始され、本船は拘留されます。本船が有責とされた場合、罰金が科される場合もあります。麻薬の運び屋は、高度な技術を用いて麻薬を船舶や貨物に忍ばせます。入港前から出港まで監視を強化することが重要です。コロンビアに寄港する際には、本船に麻薬が持ち込まれないよう対策を取ることが推奨されています。詳細は添付資料をご参照ください。

### 1. はじめに

海事当局 (DIMAR) や各港の麻薬担当官から、最近の麻薬輸送の実態、コロンビア諸港への寄港時の注意点や推奨事項を聞き取って本レポートにまとめた。

### 2. コロンビア当局の懸念

果物 (特に Uraba・Magdalena 地域のバナナ) を積んだリーファーコンテナや石炭・スクラップの積載船に麻薬が隠されることが多い。

### 3. 麻薬の運び屋の手口

- 少量の麻薬を本船上 (船室、ファンネル、甲板、貯蔵室、機関室など) に隠す。
- コンテナ (特にリーファーコンテナ) 内に不法物質を隠す。
- 麻薬を入れた容器をばら積み貨物に紛れ込ませる。
- 麻薬を貨物に似せてばら積み貨物 (特に石炭) に紛れ込ませる。
- 麻薬入りの袋をシーチェストに潜めたり、ダイバーを使って外板・ラダー・チェーンロッカー・推進機・ベント管・海水取入口などに取り付けたりする。

### 4. 新たな輸送ルート

コロンビアの Buenaventura や Tumaco などの太平洋沿岸の港から密輸されることが多いが、最近ではエクアドルやペルーを経由し、監視がさほど厳しくないチリやウルグアイに輸送されるルートができていますので、コロンビア以外の国でも麻薬への注意が必要。

### 5. 当局 (DIMAR) の決議

コロンビア水域を航行する船舶は、本船の Ship Security Alert System が当局の受信機とつながるよう所定の設定を行わなければならない。

## 6. 防止策

### 入港前の対策

- 船員が船外に出る場合は、麻薬の運び屋からの接触到に用心すること。
- **Ship's Security Plan** のアップデートと遵守
- 当局との連絡を担う **Ship's Security Officer** の選任
- 代理店から最新の港湾情報の入手
- 入港前・入港中・出港後における人（当局・ステベ・港湾関係者・船員）の乗下船に関する正確な記録の保持

### 入港中・錨地での対策

- 船底検査
- 警備員の配置
- 第三者による怪しい行為が認められた場合は速やかに船長に報告する。
- 警備担当の船員は乗船する者の所持品検査を行う。
- 錨地では 24 時間体制での監視
- 入港中はロッカーやコンテナの封印シールが破損していないか常に監視する。
- アクセスが難しい区域には侵入ができないようにバリアーを設置する。
- 不審者が乗船しようとした場合は速やかに **Security Officer** か船長に報告する。
- 居住区や貯蔵庫には施錠する。
- ステベなどの乗船者が居住区や荷役を行っていない船倉に近づかないように監視する。
- 陸上側 **Gangway** には監視員を配置する。
- 海側 **Gangway** は格納しておく。
- 全ての乗船者を **Gangway Logbook** に記録する。
- 追加の警備を配置して、不審な行動を取るものがないか監視する。
- 固体ばら積み貨物の積載が完了したら、サーベイヤー立会いの下、ホールドのシーリングを施す。

## 7. 本船から麻薬が見つかった場合の対応策

- 速やかに **P&I** クラブ、**P&I** コレスポンデント、船主、管理会社に通知する。
- 速やかに警察に通報して全ての関連情報を提供する。
- 麻薬には手を触れない。
- 麻薬が見つかった区域の写真撮影・ビデオ撮影を行う。
- 当局によって麻薬が発見された場合は、船長と乗組員は取調べを受けることになる。本船の出港も差し止められる。麻薬がコンテナから見つかった場合は、コンテナは証拠物として押収される。

### コロンビア法による罰則規定

- 当局による調査：港湾規則違反が認められた場合、調査は 3 年程度に及ぶことがあり、最悪の場合本船に罰金が科される。罰金は **USD350,000** に及ぶことがある（行政罰）。
- 検察による刑事捜査：本船・乗組員が捜査を受ける場合、本船は拘留され、乗組員は禁錮となる。乗組員が有罪となった場合、8 年から 20 年の禁錮、及びコロンビアの最低賃金の **1,000** か月から **50,000** か月分の罰金が科される（刑事罰）。船主が有罪となった場合、本船は没収されることがある。

以上

# Colombia Drug Smuggling

---

## Report 2024

 [aamultiprime.com](https://aamultiprime.com)

# 1. Introduction

As part of our commitment to contribute to loss prevention in Colombia and across the region, our team regularly engages in meetings with representatives of the Colombian Highest Maritime Authority (DIMAR) and the officers in charge of anti-narcotic policies in the ports. We gather updated information about new practices and precautions to be aware of, as well as relevant recommendations and measures to adopt while visiting any of our ports.

This ongoing engagement has culminated in our 2024 report, which reflects the latest insights and strategies in combating the challenges faced by the maritime industry.

Recent events highlight the ongoing challenges in countering cocaine trafficking. For example, on February 8, 2024, British authorities announced a historic seizure of over 12,500 pounds of cocaine concealed in a banana shipment from the Port of Turbo, Colombia, to Southampton.

This incident, marking the largest single drug seizure in UK history, emphasizes the advanced techniques used by cartels to transport substantial drug quantities into Europe and the UK, thereby confirming the global impact of Colombian narcotics.

This report results from our efforts and experience over the last years, successfully assisting in several drug smuggling-related incidents and administrative investigations for breaches of shipping regulations, including the ISPS Code.

We trust that this report will serve as a valuable resource for all P&I Clubs, their Members, the Masters and crews, and, in general, the entire marine industry with an interest in Colombian ports to mitigate incidents associated with drug smuggling activities.

---

## 2. New drug smuggling concerns from authorities in Colombia.

### 2.1 Fruits, coal, and scrap cargoes among the most targeted for drug contamination

In 2024, one of DIMAR's principal concerns is the increasing number of cases involving drugs smuggled in containers of fruit, as well as in coal and scrap cargoes.

The port authorities in Santa Marta and Turbo have raised special concern about the discovery of drugs in reefer containers carrying fruits, particularly bananas from the Urabá and Magdalena regions, as evidenced by the aforementioned seizure in Southampton.

Moreover, bulk cargoes such as coal and scrap are also of significant concern, as they are frequently targeted by drug smugglers to conceal large quantities of illegal substances.

In the past two years, the anti-narcotic police have uncovered substantial amounts of cocaine disguised as "fake coal" and hidden within other bulk cargoes, necessitating the use of special alkaloid tests to detect the presence of drugs.

Additionally, there have been several cases of drug smuggling reported within scrap cargoes, where metal structures designed to hide the illegal substances have been overlooked by control officers and crew members.

---

## 2.2 Illegal “storage” locations found nearby main terminals.

As Colombia's coca leaf crops and Cocaine production has exceeded historical records in 2023, the illegal exports of this substance have also been raising.

In view of this phenomena, the antinarcotic police suspects that gangs may be storing drugs in hidden locations close to the main public and private terminals in order to reduce exposure to be discovered while transporting the drugs by road. This new behavior appears to be assisted in some cases by collaboration of personnel at the terminals, which allow the drugs to be introduced especially during night hours.

Moreover, one of the biggest concerns for local authorities is that the above situation may be causing an increase of bribery, threats, and extorsions of port officers or security personnel of the Terminals, which could potentially be extended also to crewmembers.

For the above reasons, it is recommended to have high precaution if crewmembers decide to go ashore during its call at any Colombian port.

### 3. Most common strategies/methods currently used by drug traffickers.

Colombian drug traffickers develop every day new complex trafficking patterns to use commercial vessels and their crews to transit illicit substances, especially cocaine, worldwide. Even though Colombian shipping terminals comply with ISPS standards and the Navy and local authorities have implemented several controls to avoid and prevent drug smuggling, drug traffickers have developed creative ways to hide illegal drugs inside and outside the vessels calling at Colombian Ports.

Please be aware that the most common strategies/methods currently used locally by drug traffickers include:

- A** Hiding relatively small amounts of drugs in certain remote locations onboard (e.g. cabins, funnels, decks, store room or engine room) with collaboration of stevedores or even crew members. In some cases, visitors (with or without collaboration of the crew) board the vessel and quickly hide these packages in certain remote locations.

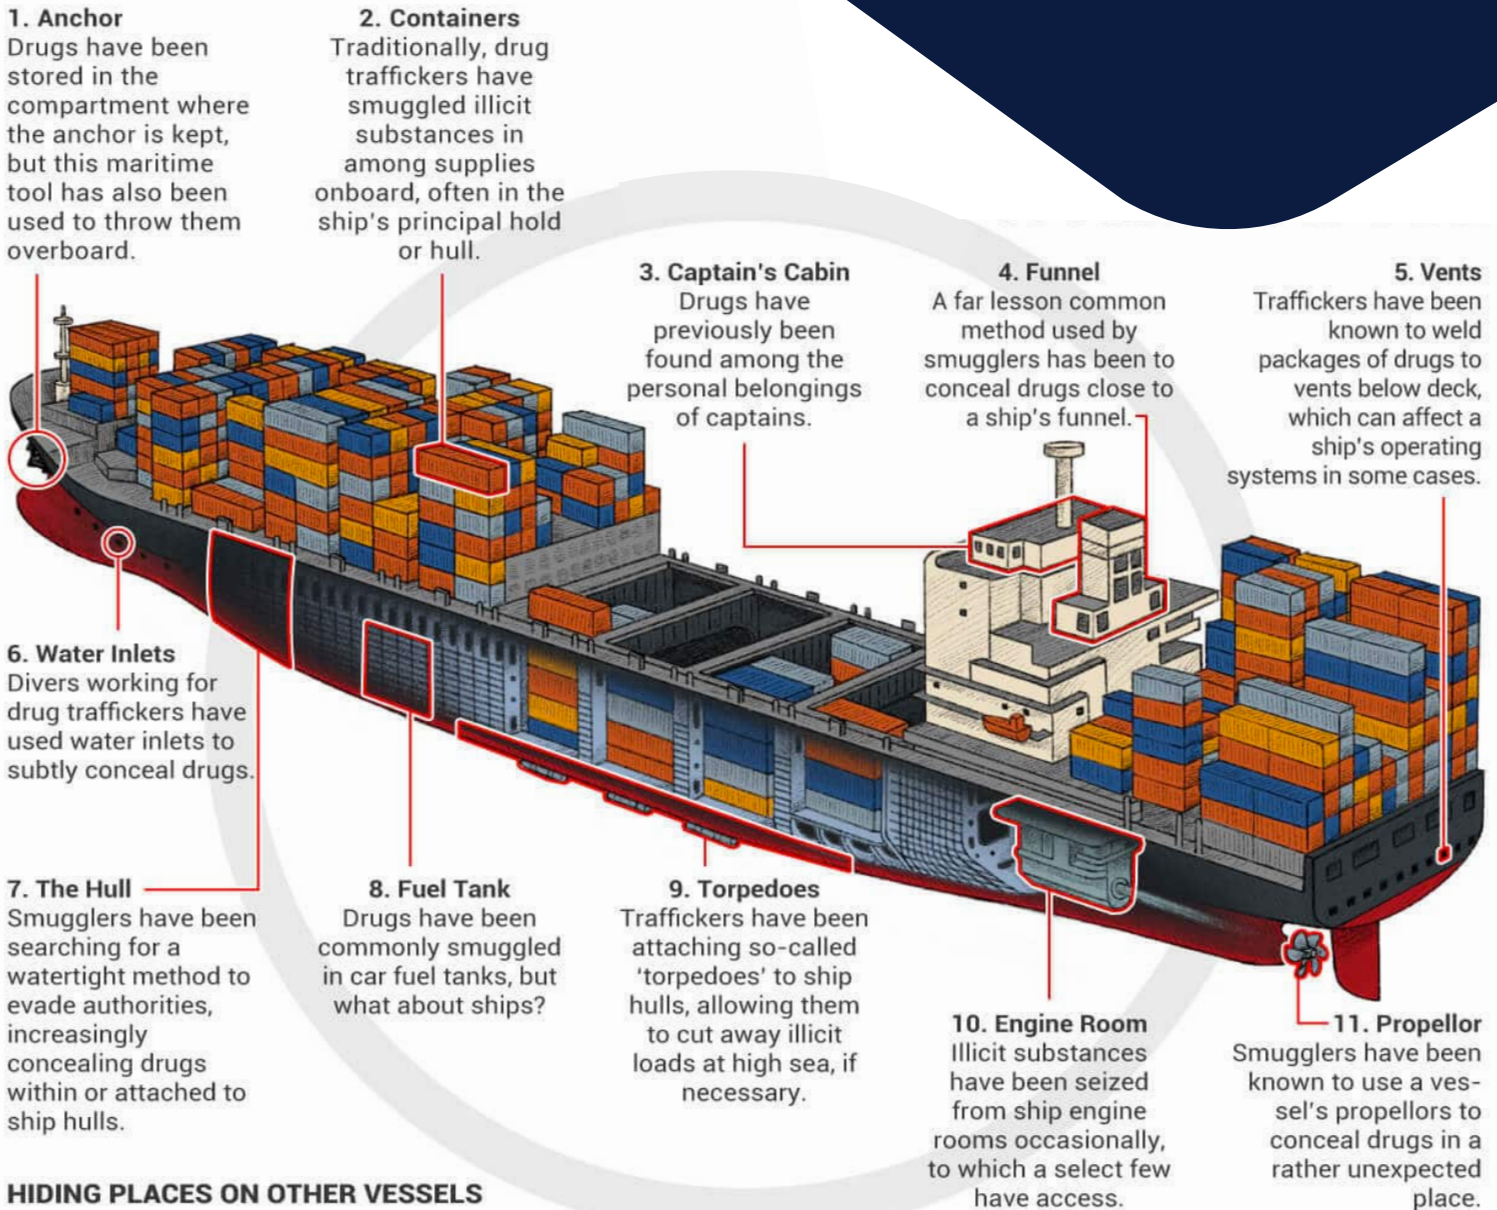

- B** Placing illegal substances within sealed containers before loading. One of the most common methods currently used by drug traffickers all around the world is to break into containers and hide drugs within the cargo, replacing then the security seals (usually this method involves certain level of collaboration from the terminal operators and/or the cargo agents). Most targeted containers are reefers.
- C** Burying packages with drugs within bulk cargoes. This method allows high quantities of illegal substances to be moved at any time, usually within the stow.
- D** Placing camouflaged drugs within bulk cargoes (especially coal cargoes). Drug dealers develop new methods to camouflage drugs within these cargoes every day, managing even to simulate coal texture and shape to traffic drugs without been noticed by security officers or crews.
- E** Introducing bags filled with drugs in the sea chests and/or attaching them to the vessel's hull, rudders, anchors, propeller, vents, or water inlets; using divers while the vessel is berthed or at anchorage.

Even though this appears to be a modality use less nowadays thanks to the effective measures often taken by shipowners and the navy, it is still recommended to be aware of it, maintaining security precautions and following the recommendations provided in this report.

# Hide and Seek: Drug Traffickers get creative at sea

## HIDING PLACES ON OTHER VESSELS

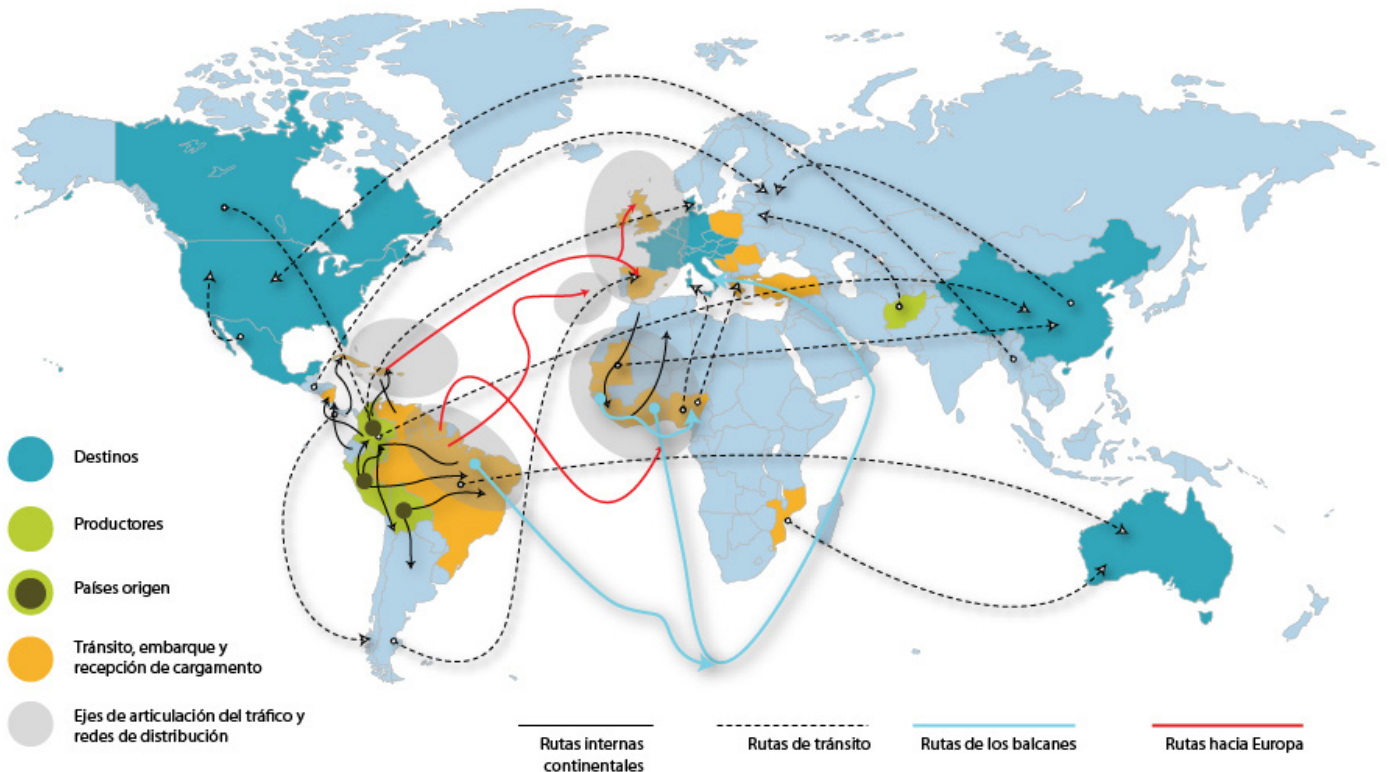

-  **12. Store Room**  
A ship's sail store room is out of bounds for most, but traffickers have found a way to use it to their advantage.
-  **13. Fishing Nets**  
Fishing Nets have been used to bring drugs aboard ahead of departure.

Image source: InSight-Crime Investigations 2021

## 4. New trafficking routes: shipowners should be aware also in other ports of southamerica.

While most of the cocaine trafficked from Colombia keeps being illegally exported by ports located in the pacific coast, such as Buenaventura or Tumaco, the Colombian antinarcotic police recently identified that drug traffickers may be creating new routes through the south of the country, passing through Peru or Ecuador aiming to reach Chile or Uruguay where port drug controls may be lighter.

## **5. Performance standards for ship's security alert system – Dimar's resolution no. 0502 of 2023.**

Over the last years, DIMAR had raised some concerns about the possibility that many security incidents, mostly relatively minor, were not being reported in a timely manner to local port state of control stations in order to prevent potential investigations, delays and even fines to be imposed by Colombian port authorities.

In view of the above, DIMAR issued on July 28th, 2023, the Resolution No. 0502 of 2023 by which it is ordered that all foreign ships navigating Colombian waters shall make the required configuration on its Ship Security Alert System (S.S.A.S.) for it to be harmonized with the reception equipment of the local port state of control stations in order to ensure prompt report of any security incidents, allowing the local authorities to assist and mitigate any possible losses.

In order to comply with the above order, it is recommended that shipowners confirm with their local agents the e-mail addresses of the respective port state of control stations and remind its crews that in case of security treats or incidents, prompt report is mandatory.

It is worth noting that Resolution No. 0502 of 2023 was issued in order to comply with the contents of Resolution MSC 147(77) of the Maritime Safety Committee of the IMO issued on May 29th, 2003.

## 6. Preventive Measures

Vessels calling to Colombian ports should take actions to reduce the risks of drugs being placed in any manner in/on the vessel. To fully protect Member's interests concerning drug smuggling at Colombian ports, we recommend the following advice and preventive measures:

### 6.1 Current situation and specific risks at Colombian Ports

- 
 Colombian ports present some risks in terms of drug trafficking and, although there are law enforcement authorities in all the ports, we would like to suggest the preventive measures discussed in point 6.2. below.
- 
 Drug inspections performed by the Colombian navy are mandatory at the following ports: Puerto Drummond, Puerto Nuevo, Puerto Bolívar, Puerto Brisa and all Ecopetrol Terminals. In these places, it is advisable that a surveyor monitors the inspection, coordinates with the different involved parties and reviews the respective report.
- 
 In the rest of Colombian ports, underwater inspections are not mandatory, but advisable due to drug smuggling risks. Normally, said inspections can be undertaken by the navy or by private diving companies.
- 
 As public and private Terminal's constantly update their security scheme measures, it is important for ships to request information about any specific requirements to be fulfilled with before berthing at any Colombian Port.

### 6.2 Recommended measures before entry

- 
 The crew going ashore should be informed that it is common practice in Colombia that drug traffickers may seek to be friendly just to achieve their co-operation to smuggle drugs and that local authorities are likely to act forcefully against any crewmember who is considered to be associated with drug traffickers.
- 
 The owners and operators of vessels trading in Colombia must ensure that the Ship's Security Plan (SSP) is regularly reviewed and updated, and that crews have a proper knowledge and understanding of it. Moreover, it is required to have a Ship Security Officer designated to be the person in permanent communication with local authorities to prevent any security incidents.

- The ship's agent must provide the Master with the relevant updated data related to the Colombian Port. The Master should demand prompt delivery of this data from the ship's agent.
- The ship should keep accurate records of all activities observed and the actions taken by local authorities, stevedores and other shore-based personnel and crew before entry into port, during the stay and immediately after departure.

### 6.3 While in port or at anchor

- Prior to Sailing, an underwater inspection could be undertaken by a reliable private Diving Company in presence of the P&I Correspondent, to ascertain that no illegal substances are attached to the vessel below her waterline.
- Although Colombia's terminals comply with ISPS standards, it is advisable to provide extra private security on board monitored by the P&I Correspondent. In this regard permanent watchmen should be present in areas where stevedores or repair technicians are working onboard the ship. During hours of darkness all areas should be well lit to facilitate visual monitoring of activities.

Any suspicious activities conducted by third parties on the vessel should be reported to the Master. Attention should be paid to any boats approaching the vessel and any suspicious activity in the vicinity of the ship which may warrant further investigation. The use of a searchlight during nighttime should be considered.

- The crew member on guard should undertake body/belongings searches at all times to people entering the ship (not just randomly as it usually happens). Even guards going on board should be body searched (and their belongings).

***Any suspicious activities conducted by third parties on the vessel should be reported to the Master***

- It is important to maintain 24/7 surveillance while at anchorage as some incidents have been observed when crews are sleeping or unguarded at night hours.
- The crew should perform regular shipboard inspections throughout the duration of the port call. As explained above, it would be very advisable to employ additional security guards from trusted providers. When broken/missing seals for compartments, lockers, containers etc., are discovered an investigation should be conducted and if nothing is found the seals should be replaced by the crew. A record should be made in the logbook together with a note of the outcome of the investigation/search and the relevant seal numbers.
- Even detailed searches prior to departure can sometimes be inadequate due to the inaccessibility of some areas of the vessel. Sometimes, the best defences are physical barriers on the inside and outside that limit entry.
- The crew must inform the Ship Security Officer or Master if they are unsure whether a person has a legitimate reason to be on board and deny access to those who refuse or are unable to establish their identity and purpose of visit.
- Secure and lock areas such as accommodations and deck stores and strictly monitor the activities of stevedores, contractors, and other visitors. Stevedores and other shore personnel should be kept away from crew quarters and non-working cargo holds, and these spaces should remain closed.
- The shoreside gangway ladder should be kept well-guarded. The seaside ladder should also be stowed, secured, and surveilled.

- It would be important to include in the Gangway Logbook (or in another ship's registry) the registration of every person boarding the ship, including stevedores, operators, and even private guards (not only authorities and agents as it usually happens).
- The crew must inform the Ship Security Officer or Master if they are unsure whether a person has a legitimate reason to be on board and deny access to those who refuse or are unable to establish their identity and purpose of visit.
- Extra crew members (or extra private guards) should be tasked to keep watch on persons loitering on deck or elsewhere on board and, if possible, try to avoid leaving outsiders (stevedores etc) wandering alone on board.
- Sealing of cargo holds should be arranged by an independent surveyor upon completion of loading of solid bulks.

## 7. Actions to be taken if drugs are found onboard.

*If drugs are found onboard, the following actions would be highly recommendable:*

The P&I insurer, the local P&I correspondent, and the shipowner/manager should be immediately contacted.

Formally inform and provide all the available information to the Police at the port. This can be done directly by the Master, or through the Vessel's agents at port. This will mitigate the risk of the Master and the crew becoming part on the criminal investigation undertaken by the Colombian Prosecutor's office when drugs are found.

The drugs must not be touched.

Photograph or video the area of the ship where the drugs were found but leave it untouched and seal it off to prevent any unauthorized access.

If drugs are found on board by the authorities, the crew members and the Master will be temporary placed under authorities' custody and they will be part on the preliminary investigation. The vessel will be also detained at port for further investigation. Sometimes, when drugs are found within containers, these latter become apprehended as they are considered evidence under the criminal process.

***Additionally, it is important to note the strict punishments established under Colombian law for events of drug trafficking:***

- Administrative investigation by HM: If the HM decides to open an investigation for breaches to Colombian port security regulations (i.e., ISPS Code), the proceeding may last around 3 years and the worst-case scenario would be that the HM issues a fine against the ship at the end of the investigation. These fines could go up to USD350,000.
  
- Criminal investigation by Public Prosecutor: in case the vessel/crew is involved at the criminal investigation, the vessel may be detained, and the crew imprisoned (if there has been a change of all the crew, then only the ship detention would apply). Additionally, please find below the relevant Colombian criminal regulations on drug smuggling (these are worst-case scenarios): the Colombian criminal code states that any person involved in the traffic, production or carriage of illegal drugs will be subject to the penalty of imprisonment from eight (8) to twenty (20) years and a fine of between 1,000 and 50,000 Colombian monthly minimum wages.

The same code states (Article 377) that any person that may use or allow the use of movable goods for the production, storage or carriage of illegal drugs will be subject to the penalty of imprisonment from six (6) to twelve (12) years and a fine of between 1,000 to 50,000 Colombian monthly minimum wages. If the shipowner is found guilty of any criminal charges by a court, the vessel could be permanently seized by Colombian authorities.

The general rule pursuant article 1544 of the Colombian Commercial Code is that shipowners are jointly and severally liable for their vessels’ masters’ faults, however, this extension of liability would not be applicable in relation to criminal charges.

For a shipowner to be found guilty in a criminal proceeding, it would have to be proven that he determined the commission of the crime (i.e., convincing the ship’s crew to carry drugs), or that his operation was directly aimed to the commission of the crime, either independently or in collaboration with other criminal organizations.

In all of the aforementioned events, our company A&A Multiprime is able to provide immediate assistance by appointing a trusted surveyor to monitor the whole procedure and assist the master, and, if necessary, appointing one of our trusted criminal lawyers to defend the member's interests, as we have done successfully in the past.
